Professional Summary

Aspiring Software Engineer and AI enthusiast with experience in web development, machine learning, data annotation, and AI-related projects. Strong foundation in HTML, CSS, JavaScript, TypeScript, React, Python, Git, and software development principles. Currently contributing to AI and AGI-related projects at iCog Labs and participating in hands-on software engineering and machine learning projects through 10 Academy. Passionate about building reliable software, solving complex problems, and contributing to AI-driven solutions.

Education

Bachelor's Degree in Computer Science

Addis Ababa University— Ethiopia

Expected Graduation: 2027

Relevant Areas of Study:

- Artificial Intelligence Fundamentals
- Data Structures and Algorithms
- Web Development
- Software Engineering
- Database Systems

Technical Skills

- **Programming Languages:** Python, JavaScript, TypeScript, HTML, CSS
- **Frameworks & Libraries:** React
- **Tools & Technologies:** Git, GitHub, VS Code
- **Concepts:** Data Structures & Algorithms, Software Testing, Debugging, Machine Learning, Data Annotation, Object-Oriented Programming
-

Projects

Multi-Dog Breed Classification

Python, Machine Learning, Deep Learning

- Developed a machine learning model capable of classifying multiple dog breeds from images.

- Performed data preprocessing, model training, evaluation, and prediction analysis.
- Applied computer vision and deep learning concepts to improve classification accuracy.
- Worked with image datasets and model performance metrics.

Tic-Tac-Toe AI Using Minimax Algorithm

Python, Artificial Intelligence, Algorithms

- Built an intelligent Tic-Tac-Toe game implementing the Minimax algorithm.
- Designed an AI opponent capable of making optimal decisions.
- Applied game theory, search algorithms, and decision-making concepts.
- Improved understanding of algorithmic problem-solving and AI fundamentals.

Personal Portfolio Website

React, TypeScript, HTML, CSS

- Designed and developed a responsive personal portfolio website.
- Showcased technical skills, projects, and professional experience.
- Implemented modern UI/UX principles and responsive layouts.
- Utilized React and TypeScript to create reusable and maintainable components.

Amazon Clone

React, JavaScript, HTML, CSS

- Developed an e-commerce web application inspired by Amazon.
- Implemented product listings, shopping cart functionality, and responsive user interfaces.
- Applied component-based architecture and modern frontend development practices.
- Strengthened skills in state management and user experience design.

Internship & Experience

iCog Labs | Current

- Contribute to AI and AGI-related projects.
- Participate in data annotation, evaluation, and AI workflow tasks.
- Collaborate with teams to support AI model development and improvement.
- Apply analytical and problem-solving skills to project requirements.

Software Engineering & Machine Learning Trainee

10 Academy

- Worked on practical software engineering and machine learning projects.
- Applied software development best practices and collaborative workflows.
- Gained experience in data processing, model development, and project execution.

Languages

- Amharic — Native
- English — Professional Working Proficiency

Additional Information

- Strong interest in Artificial Intelligence, Machine Learning, and Software Engineering.
- Comfortable working with unfamiliar codebases and learning new technologies.
- Excellent problem-solving, debugging, and analytical skills.
